

Rawlings Uniform Cleaning Instructions

The uniforms should be washed **immediately** after each use if at all possible, in **cold water**.

The rinse cycle should likewise be set for **cold water**.

We recommend using a detergent similar to Tide[®] for Coldwater.

Prior to washing, turning the garments inside out will help preserve the twill or Perma-print lettering. Do not wash uniforms with other items, such as towels.

DO NOT USE CHLORINE BLEACH!

Heavily soiled garments (grass, dirt, clay mud), pre-treatment is recommended

- Spray on products such as Spray 'n Wash[®] or Shout[®] and leave on about 15 minutes to absorb before washing.
- Products such as Stick Stain[®] or Shout Gel[®] can be rubbed on stubborn stains and left overnight for washing the next day as well.
- For blood stains, it is best to rinse in **cold water** as soon as possible, and if necessary, **soak in cold water** before washing. One of the above pre-treatments can also be used, or an oxygen based laundry booster such as Oxy Clean[®] can also be used for blood stains.
- An oxygen based laundry booster such as Oxy Clean[®] can also be used to eliminate odor.
- For ink stains, use hair spray. Simply spray on and rub until the ink is gone. Then wash as normal.

DO NOT OVERLOAD WASHER.

Remove uniforms **immediately** after washing and hang dry all garments if at all possible.

DO NOT DRY UNIFORMS ON HIGH HEAT

If you must use a dryer, use a damp dry or air dry setting. High heat can cause shrinkage, perma-print ink to crack, twill to wrinkle, etc.

DO NOT OVERLOAD THE DRYER

The uniforms will stick together, especially those with perma-print ink. Remove the garments **immediately** after the dryer has finished.

DO NOT DRY CLEAN OR IRON

To avoid static and lint build-up, use an anti-static agent such as Bounce[®] Dryer Sheets. Store in a cool, dry area, protected from sunshine and fluorescent lighting.

Help your uniform remain the "Mark of a Pro"[®] and the "Finest in the Field"[®]
